

COMPANY ANNOUNCEMENT

03 September 2019

PanAust recognised for embracing technology to improve operational efficiencies in the mining industry

PanAust has been acknowledged by SAP for its work to improve operational efficiencies at the 2019 Australia and New Zealand SAP Best Run Business Awards where it was named as a finalist of three in the data and analytics category.

The Awards celebrate the achievements of SAP customers and partners who are leveraging its technology to transform their businesses and drive innovation. PanAust’s internally developed Digital Operational Reporting Dashboard was recognised as a solution that had ‘benchmark’ potential for the mining industry.

The Dashboard collates data required for daily site operational meetings. Over 50 per cent of processing, mining, fixed and mobile maintenance reliability and support services production figures are now automated and accessible in the one, easy to use application.

The application has improved meeting efficiency by reducing manual data entry and has become a powerful tool for data visualisations and operational key performance indicators.

PanAust Executive Chairman, Dr Yang spoke of SAP’s acknowledgement.

“This recognition highlights how PanAust is committed to identifying opportunities that will enhance operational efficiencies to sustainably increase production and cost outcomes.

“The Daily Operations Reporting Dashboard has transformed the way site teams report operational data. It has increased daily site operational meeting efficiency by 75 per cent and reduced the time to produce daily reports by one hour.

“On behalf of the PanAust Board, I would like to thank the cross-functional team whose hard work and dedication to our business produced this innovative application that the Company is proud to stand behind,” Dr Yang said.
